

4D CULTURE

Dress Up Dance and Dive into Culture

ISSUE NO4 |
MARCH 2024 |
IN THIS ISSUE:

- **About us**
- **Info Day in Athens**
- **Event Meeting in Yambol**

About us

4DCulture is a multidimensional project, in which the knowledge and practices of different fields are combined in order to create a multilevel educational tool, inspired by the lessons of cultural geography, and the potential which lies within the new means of representation and interaction that VR technology can provide.

The main goal is to use state of the art technology as a means of reviving in a contemporary way cultural aspects of the past. The project's outcomes are articulated in such a way as to assure a result which will respect the different cultures, have strong pedagogical virtues and, at the same time, provide users with an innovative experience. So, the project is about to follow a new pathway to the educational experience targeted to the sectors of textiles, dancing, history, folklore and ethnography by introducing the elements of motion and visualization into a digital, multi-disciplined learning approach.

Info Day in Athens

On the 07th of March 2024 took place our recent Info Day held by Lygkistes in Athens, Greece.

In this event, which was a great success, dancers of all ages gathered where issues were discussed regarding the nature of the 4D culture project and what it deals with, who are the pioneers and what is the purpose for whom it is being carried out, and which Institutions and Universities are collaborating.

Later the same evening, as in Greece that day was celebrated "Tsiknopempti" in view of the Carnival, they had a barbeque in the courtyard, and they danced and had fun to the sounds of Greek traditional music.

Event Meeting in Yambol

A week later of the Info Day, on the 14th of March, was held our Final Partnership Meeting in Yambol, Bulgaria.

There, all partners had the chance to delve deeper into the technical, social and educational aspects of the 4DCulture project. Discussion was mostly directed towards issues concerning the project's further development and certain steps were mapped in order to ensure its sustainability.
